Conditions Of Purchase.

Note

1. Customs and Import Duty: All products imported into the Australia are subject to Australia import duties and taxes. These are levied once the consignment reaches your country. Although we have no control over these charges and cannot predict exactly what they will be it is our understanding that the duties and taxes provision identified in our Tax Invoice represents the payments liable. In the event that your local customs office, for whatever reason, applies costs over and above those indicated to us we will advise you accordingly and will invoice you separately for the over and above amount. When ordering you are considered the importer of record and must comply with all laws and regulations of the country in which you are receiving the goods.
2. Dedicated Site Module: This does not include assembly and installation. Full assembly and installation instructions are supplied and under normal circumstances we would expect assembly and in-ground installation to take no more than 12 man hours. Material costs over and above this are minimal. It is probable that local safety regulations will require an approved energy impact-absorbing product or safety matting material be installed beneath the structure. This will also need to be considered in your budgeting.

Pipehenge Payment Options

On our receipt of your order Pipehenge Services Ltd. will forward to you a detailed Commercial Invoice. This will include packaging, and unless otherwise mutually agreed, air freight and road delivery costs to the shipping address you have identified. Also included will be our best possible estimate of the import duties and taxes that will be applied by the Australian authorities to your consignment on arrival. (See Conditions of Purchase, Note 2.).

Three payment options:

Payment can be either of the following three options;

- 1. Bank Draft**
- 2. Telegraphic Transfer**
- 3. Official School Purchase Order**

1. Bank Draft:

Based on the total \$AUD amount of our Commercial Invoice you can arrange with your bank for a Draft to be made payable to the address below. The Bank Draft should then be air mailed to Pipehenge Services Ltd. Please make sure you accompany this with a copy of our Invoice so we may properly credit your account.

Pipehenge Services Limited
Private bag
Picton
Marlborough
New Zealand

A draft normally takes 15 working days to clear so this method of payment does slow down your delivery as we don't order your items until payment is received and we don't ship items until your funds clear. The Bank in your country will advise you of their charges to issue a Draft.

2. Telegraphic Transfer

The Telegraphic Transfer of funds will need to be arranged with your local bank. They will require from you the following details:

Our Account Name: Pipehenge Services Ltd.

Our Account Number: 012-3011-0759382-00

Our Bank: ASB Bank, Auckland Branch,
Cnr Queen & Wellesley Streets, Auckland.

Our Swift Code: ASB BNZ 2A

This is certainly the most efficient method to transfer funds. It will ensure dispatch of your Pipehenge product at the earliest possible date.

3. Official School Purchase Order

As per the standard procedure for your school district.
